- **Programming Language:** HTML5 (Proficient), CSS3 (Proficient), JavaScript (Proficient),
- **Frameworks/Libraries:** SCSS (Beginner), Bootstrap (intermediate), React (intermediate), ReduxToolKit (Intermediate), MUI (intermediate),
- **Development Tools:** Git (Intermediate), GitHub (intermediate), PostMan (intermediate), JIRA (Intermediate)

Projects

Trade Excelsior

Jan 2024 – Till Date

Project Summary

Excelsior is a **stock market learning** and **trading assistance platform** that helps users understand and improve their trading skills. The platform provides access to **educational resources**, **market trends**, and **strategy-based insights** to support informed decision-making. Users can explore the Books section for in-depth knowledge, analyze market trends, and access curated references and success stories to enhance their learning journey.

Tools and Technologies

- Front End Technologies: HTML5, CSS3, JavaScript, React Js, Redux Tool Kit, MUI, Formik & Yup
- Back End Technologies: Java, SpringBoot, Microservices Architecture
- RDBMS Application: MongoDB
- Tools Used: VS Code Editor, Postman, Lighthouse
- Team Size: 6

Roles and Responsibilities

Being a developer, my role involved designing and developing core functionalities of the Agency Module:

- Designed and developed the Books, References and Support features in Admin Section using React JS and Material UI.
- Implemented role-based access control using React Router and managed global state with Redux Toolkit.
- Created dynamic dashboards and interactive components to enhance user learning and engagement.

- Implemented dynamic form validation using Formik and Yup, improving user input handling and reducing errors.
- Contributed to 5 Agile Sprints, delivering features ahead of schedule by 2 – 3 days in 3 sprints and achieving 100% sprint delivery rate.
- Collaborated with cross-functional teams including UI/UX designers, QA and backend engineers to resolve 15+ reported issues, improving application stability by 60%.

Experience

Infopine Consultancy Pvt Ltd | Front End Developer

Unilog B2B Company (in collaboration with Infopine Consultancy Pvt Ltd) **Nov 2021 – Dec 2023**

- Developed and maintained front-end features for 3+ e-commerce projects (**Hikma, Power&Tel, Noble, Alaska**), enhancing customer engagement and driving a 15% increase in user retention by creating user-friendly, responsive interfaces.
- Worked as part of a 5-member team to enhance the **Infopine Consultancy website**, utilizing HTML, CSS, JavaScript, and jQuery for improved design, performance and contributing to a 98% project completion rate.
- Leveraged **HTML, CSS, and JavaScript** to deliver cross-platform responsive designs, optimizing web performance and reducing page load times by up to 20%.
- Enhanced the **Unique Science Academy website**, collaborating effectively within a team of 4 developers to deliver a 60% improvement in site functionality and user engagement.

Infopine Consultancy Pvt Ltd | Front End Developer Intern

Unilog B2B Company (in collaboration with Infopine Consultancy Pvt Ltd) **July 2021 – Oct 2021**

- Developed and maintained clean, efficient code using HTML, CSS, and JavaScript, reducing **codebase complexity by 25%** and improving website **load times by 20%**, resulting in enhanced user experience and a 15% increase in overall site traffic.
- Collaborated closely with backend teams to optimize **API integrations** and user interface responsiveness.
- Optimized websites for improved performance and responsiveness.

Certifications and Training

• **Front End Development** **Apr 2024 – Oct 2024**

Successfully completed a comprehensive Front-End Development program at ACube Academy.

• **AI Tools** **Mar 2024**

Participated in an AI Tools workshop organized by Be10x.
